## Annual Asbestos Notification

### July 2019

In compliance with the U.S. Environmental Protection Agency (EPA) Asbestos Hazard Emergency Response Act (AHERA), we are required annually to inform all parents, teachers, and staff as to the availability of our asbestos management plan as well as any activities which have taken place in the previous year. Required as per AHERA 40 CFR § 763.93(g)(4) and 40 CFR § 763.84(f).

A periodic surveillance of asbestos containing building materials (ACBM) is performed in all district buildings every six months. This is done to ensure that asbestos containing materials are maintained in good condition. A complete re-inspection of all buildings containing asbestos was completed in January. The re-inspections and sampling will be conducted by AHERA Accredited Inspectors and Management Planners (PARS Environmental Inc.). The results of the re-inspection and sampling will be included in the AHERA Management Plan. A copy of the AHERA Management Plan is available in the Operations Department, 1014 Route 601, Skillman, NJ 08558.

The district continues to update and improve the AHERA Asbestos Management Plans. This work includes the sampling of materials that were originally assumed to contain asbestos. The improvements in the asbestos management plans are intended to make them easier to use by district custodial and maintenance workers and outside contractors that perform work within district buildings.

Should you have any questions or concerns regarding asbestos or the District's asbestos program, please call Dave Klein (609) 466-7600 EXT 7012
