FIVE BELIEFS THAT LIMIT OR LIBERATE LEARNING

Life Limiting	Beliefs
---------------	---------

Life Liberating Beliefs

Mistakes are a sign of weakness.	Mistakes help one learn.		
Speed is what counts. Faster is smarter.	You are not supposed to understand everything the first time around. Care, perseverance, and craftsmanship are what count.		
Good students can do it by them- selves. Competition is necessary to bring out the best in students.	Good students work together with others and solicit help and lots of feed- back on their work.		
Inborn intelligence is the determinant of success.	Consistent effort and effective strategies are the main determinants of success.		
Only the few bright can achieve at a high level.	Everyone, not just the fastest and most competent, is capable of high achievement.
