Wednesday 3/26/14

Our Observations:

High Pressure – clear skies

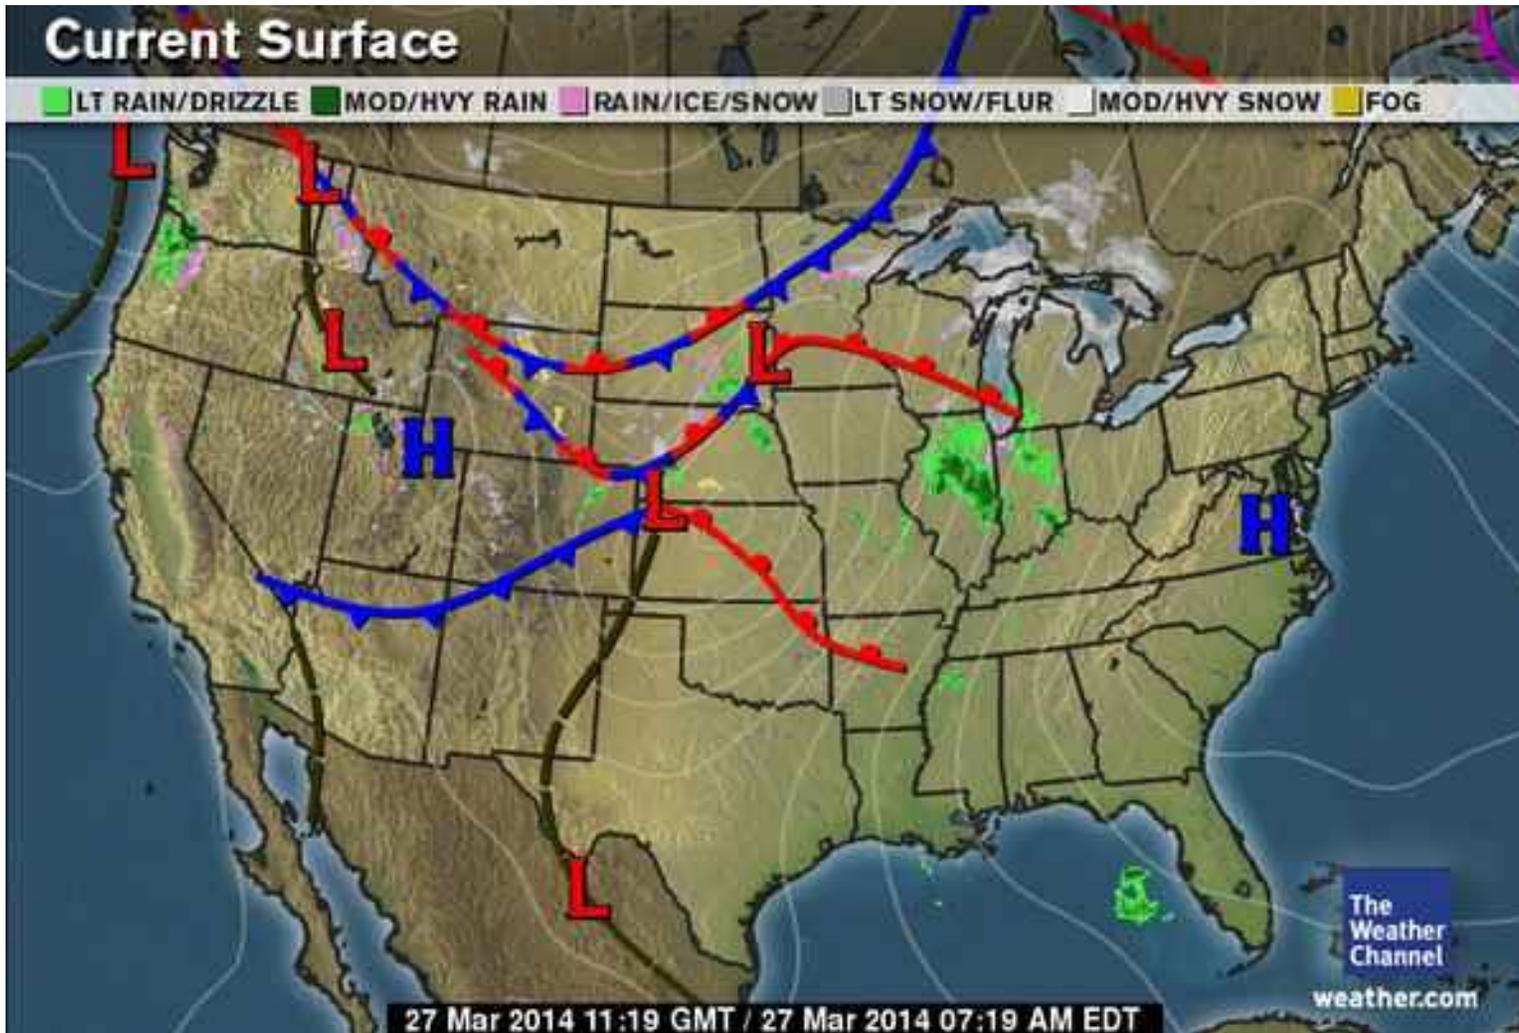

Low Pressure – rain/snow /clouds

Cold front, warm front and stationary front – rain/snow/fog/clouds

***Low pressure is close to the fronts

The Westerlies are causing our weather to move across the U.S. from West to East.

Thursday 3/27/14

Our Observations:

High Pressure – clear skies in NJ!

Low Pressure – rain/snow /clouds

Cold front, warm front and stationary front – rain/snow/fog/clouds

***Low pressure is close to the fronts

The Westerlies are causing our weather to move across the U.S. from West to East.

Our Prediction:

NJ will get rainy weather on Friday because of the Low Pressure systems and fronts that are moving toward because of the Westerlies

Friday 3/28/14
